

Coyle SWPPP Professionals

Civil Engineering Co-Op

Job Description

January 11, 2021

Position locations include West Chester, OH and Medina, OH

As a Civil Engineering co-op you will be learning erosion and sediment control design while working directly under a Professional Engineer. This position also has the opportunity for field experience, including meeting clients on active job sites to assess performance of our plans. In addition to AutoCAD, Trimble Business Center will be used during the design and plan production process. Interns should also be familiar with Microsoft Office programs.

Coyle SWPPP Professionals provides creative solutions to storm water and erosion challenges by applying engineering principles and construction services. We are a small, tight-knit company that offers the benefit of one-on one training. Though a small company, we work on project sites large and small. This position requires a self-starter, with the ability to work on a team and represent Coyle SWPPP Professionals in a positive manner.

Co-ops should have, or be in the process of completing, a Bachelor's Degree in Engineering (Civil Engineering preferred) from an accredited school. Must be authorized to work in the United States and hold a valid driver's license. Coyle SWPPP is a drug free workplace.

Please note:

The above statements are intended to describe the general nature and level of work being performed by the people assigned to this classification. They are not to be construed as an exhaustive list of all responsibilities, duties, and skills required. All personnel may be required to perform duties out of their normal responsibilities from time to time as needed.

We look forward to hearing from you!
